JINOSH D

SENIOR FLUTTER DEVELOPER

Chennai, India | +91 88703 58783 | jinosh05@gmail.com
Portfolio: jinosh.netlify.app | GitHub: github.com/jinosh05 | LinkedIn: linkedin.com/in/jinosh

PROFESSIONAL SUMMARY

Senior Flutter Developer with 6+ years of experience building and shipping cross-platform mobile, web, and desktop applications using Flutter and Dart. Hands-on experience across e-commerce, food delivery, fintech, education, trading, document processing, media, networking, and multilingual applications. Strong in Clean Architecture, MVVM, Repository Pattern, Dependency Injection, BLoC, Riverpod, Provider, and GetX, with production experience in REST/GraphQL APIs, Firebase, WebSockets, MQTT, payments, maps/location services, and CI/CD. Experienced in technical leadership, mentoring, product ownership, and AI-powered application development using Gemini, OpenAI, and Claude APIs, AI agents, MCP, and function/tool calling.

CORE TECHNICAL SKILLS

• **Languages & Frameworks:**	Dart, Flutter, Android, iOS, Flutter Web, Windows, macOS, Linux
• **Architecture & State Mgmt:**	Clean Architecture, MVVM, Repository Pattern, Dependency Injection, Flutter BLoC, Riverpod, Provider, GetX
• **Backend & APIs:**	REST APIs, Dio, GraphQL, FastAPI, Firebase, Firestore, Authentication
• **Real-Time & Messaging:**	WebSockets, MQTT, Firebase Cloud Messaging (FCM), real-time data, real-time location tracking
• **Maps & Location Services:**	Google Maps SDK, Mapbox SDK, GPS/Geolocation, Geocoding, Reverse Geocoding, Navigation/Route APIs
• **Payments & Monetization:**	Razorpay, Stripe, PayPal, CCAvenue
• **AI & Agentic Engineering:**	Gemini API, OpenAI API, Claude API, AI Agents, Model Context Protocol (MCP), Function/Tool Calling
• **AI Tools & Automation:**	GitHub Copilot, Claude Code, Gemini CLI, AI-assisted coding, testing, and deployment automation
• **Data, Device & Charts:**	SQLite, Isar, Hive, Camera, Google ML Kit, Bluetooth, Thermal Printing, PDF generation, FL Chart, Syncfusion
• **DevOps & Testing:**	CI/CD, GitHub Actions, Fastlane, Unit Testing, Integration Testing, Crashlytics, App Store & Play Store publishing

PROFESSIONAL EXPERIENCE

Faithnet Technologies Pvt. Ltd. — *Founder & CTO / Mobile Application Architect*
Jul 2024 – Present
Thirunelveli, India (Remote)

- Lead product engineering and full feature lifecycles across planning, architecture, development, testing, deployment, and production maintenance.
- Build and maintain Flutter applications across Android, iOS, web, and desktop platforms, including product, freelance, and contract engagements.
- Co-founded and built Fellow Founder from the ground up, owning application development and backend engineering as CTO.
- Developed Fellow Founder backend integrations with Gemini API, OpenAI API, and Claude API, supporting AI-powered application workflows.
- Implemented AI agents, MCP, and function/tool calling workflows across Fellow Founder, Al Quran Multilingual, and Fundae; used Claude Code and Gemini CLI to accelerate engineering workflows.
- Applied GitHub Copilot and automated AI-assisted coding, testing, and deployment workflows across Al Quran Multilingual and Fundae.
- Built and launched Al Quran Multilingual as an independent product on 2 Dec 2024; the platform supports 470+ Quran editions across 90+ languages and multiple desktop/mobile platforms.

- Developed freelance and product applications involving real-time systems, Firebase, payments, location services, notifications, analytics, and crash monitoring.

Mindorigin Technologies — *Senior Flutter Developer* **Jul 2023 – Jul 2024**

Bengaluru, India (Hybrid)

- Developed Firstock, a trading and investment platform for Stocks, F&O, and Mutual Funds using Flutter, BLoC, WebSockets, and MQTT.
- Performed extensive customization of charting packages and advanced financial charting workflows using FL Chart and Syncfusion Flutter Charts.
- Led a team of 3 developers, coordinating technical implementation and delivery while mentoring junior developers.
- Worked on real-time market-data workflows and production Flutter features for a finance-focused application.

Connective Links Technology — *Flutter Developer* **Jul 2022 – May 2023**

Chennai, India (On-site)

- Developed production Flutter applications including e-commerce, delivery, and web-based commerce solutions.
- Worked with Flutter BLoC, Firebase, Razorpay, Stripe, PayPal, and responsive UI development across application modules.
- Learned and handled iOS application development and publishing while collaborating with SEO stakeholders to improve user experience.

Excrin Thinklabs — *Junior Flutter Developer* **Jan 2021 – Jun 2022**

Chennai, India (Remote)

- Started professional Flutter development and delivered Android applications across education, food delivery, e-commerce, document scanning, and appointment-booking domains.
- Implemented Provider-based state management, Google Maps, Razorpay, Firebase, camera/document processing, and local data storage.
- Worked on Google Maps SDK, GPS/Geolocation, and location-based workflows in food-delivery and freelance applications.
- Restructured and migrated Doclense to responsive layouts and improved state management and overall codebase organization.
- Collaborated with senior developers and contributed to open-source Flutter projects while developing production-ready application features.

SELECTED PROJECTS

Fellow Founder — *Startup Founder Networking Platform* (Co-Founder / CTO Product)

Tech Stack: *Flutter*, *Dart*, *Firebase*, *FastAPI*, *Google ML Kit*, *Gemini API*, *OpenAI API*, *Claude API*, *AI Agents*, *MCP*

- Built the product from scratch; developed backend and AI integrations; tested 1,000+ visiting cards with 900+ cards achieving complete required-field extraction, representing 90%+ complete-card accuracy.

Al Quran Multilingual — *Multilingual Quran Platform* (Founder / Independent Product)

Tech Stack: *Flutter*, *Dart*, *Firebase*, *Isar*, *Unit Testing*, *AI/Agentic Workflows*

- Built and launched a cross-platform multilingual Quran platform supporting 470+ editions across 90+ languages, with Android, iOS, Windows, macOS, and Linux applications.

Firstock — *Trade & Invest Platform* (Mindorigin Technologies)

Tech Stack: *Flutter*, *BLoC*, *WebSockets*, *MQTT*, *FL Chart*, *Syncfusion Flutter Charts*

- Developed real-time trading/investment features and performed extensive chart-package customization; led 3 developers and mentored junior developers.

Cake Gallery — *Gifts & Flowers Delivery App* (Connective Links Technology)

Tech Stack: *Flutter*, *BLoC*, *Firebase*, *Razorpay*, *PayPal*, *Stripe*

- Developed and published the gifts/flowers delivery e-commerce application within 20 days.

Warehouse Management & Delivery — *Logistics & Live Tracking* (Connective Links Technology)

Tech Stack: *Flutter*, *BLoC*, *SQLite*, *PDF*, *Bluetooth*, *Thermal Printing*, *Geolocator*

- Built warehouse count management, invoice/PDF generation, Bluetooth POS printing, and a dedicated delivery application with real-time order tracking.

Jigsaw — *Puzzle Game* (Founder / Independent Product)

Tech Stack: *Flutter*, *Flame*, *Python FastAPI*, *Firebase*

- A calm, level-based jigsaw puzzle game with accounts, progress sync and leaderboard, shipping native like builds for Android, Linux, Windows and macOS.
