PROFESSIONAL SUMMARY

Results-driven **Senior Flutter Developer & Full-Stack Architect** with 5+ years of expertise in building high-performance mobile and web applications. Expert in Flutter Bloc, React JS, and Supabase, with a proven track record of leading engineering teams and integrating production-ready AI capabilities (Gemini, Claude). Specialized in architecting real-time systems and managing scalable cloud deployments.

TECHNICAL SKILLS

Mobile Architecture:	Flutter (Expert), Dart, Bloc, MVVM, Clean Architecture, Platform Channels.
Web & Full-Stack:	React JS, Supabase, Python (FastAPI), REST API Design, HTML5, CSS3, JavaScript, HTMX.
Cloud & Database:	AWS Deployment, Firebase, PostgreSQL (Supabase), MySQL, SQLite, Hive.
AI & Tooling:	LLM Integration (Gemini), GitHub Copilot, Antigravity, Git, CI/CD, ProGuard.

PROFESSIONAL EXPERIENCE

Contract Webapp & App Developer

Excrin Thinklabs

February 2026 – April 2026

- Maintained a comprehensive full-stack React JS web application, ensuring feature parity across platforms.
- Optimized data persistence and real-time synchronization utilizing the Supabase backend and PostgreSQL database.
- Identified and resolved critical production bugs, improving overall application stability and user experience.

Lead Full Stack Developer

Startup Faithnet Technologies

July 2024 – January 2026

- Architected and spearheaded the end-to-end development of the Fellow Founder mobile ecosystem and FastAPI backend on AWS.
- Integrated production-ready AI networking modules utilizing Google Gemini APIs for automated investor outreach.
- Engineered a high-performance admin dashboard using HTMX and Jinja2, reducing rendering latency by 30%.
- Orchestrated full CI/CD pipelines for seamless cross-platform releases on App Store and Google Play.

Senior Flutter Developer (Team Lead)

Mind Origin Technology

July 2023 – July 2024

- Led a 3-member engineering team in developing a mission-critical real-time trading application.
- Implemented high-frequency data streaming via WebSockets, utilizing custom throttling to maintain 60 FPS UI performance.
- Refactored legacy code into Clean Architecture patterns, improving developer velocity by 20%.

Flutter Developer

Connective Links Technology

July 2022 – May 2023

- Specialized in iOS-specific optimization and performance tuning, ensuring native compatibility for e-commerce apps.
- Collaborated with cross-functional teams to integrate complex payment gateways and Firebase analytics.

Junior Flutter Developer

- Contributed to the development and maintenance of multiple mobile applications, focusing on modular UI components.
- Collaborated with senior engineers to implement state management solutions and improve overall app stability.

KEY PROJECTS

The Qur'an Multilingual (Founder & Architect): Developed a unified cross-platform strategy for Android, iOS, Windows, Linux, and macOS, reaching a global user base.

GDO Gifts & Cake Gallery: Spearheaded UI/UX overhaul of UAE-based e-commerce platforms using Material 3, streamlining the checkout experience.

Tamizh Aasan (AI Innovation): Launched an AI-driven educational channel utilizing LLMs and automated video generation pipelines.

EDUCATION

Master of Computer Applications (MCA) | Annamalai University (2021 – 2023)

Bachelor of Computer Applications (BCA) | Apollo Arts and Science College (2018 – 2021)

OPEN SOURCE & CONTRIBUTIONS

Contributed to leading Flutter packages: *Photofilters*, *Speech To Text*, *Fancy Bottom Navigation Plus*, *Sizer Pro*, *Flutter Neumorphic*.
